OVERVIEW

The Bulk Label Printing function is an enhancement to the traditional label print function in the Enterprise Edition, allowing you to mass-print product labels at time of receiving or manufacture.

PURPOSE

The purpose of bulk label printing is to print labels at time of receiving for multiple items and quantities. You can also define different label layouts, such as shelf talkers, and also filter on items where prices have changed, and print labels for the received or on-hand quantities.

HOW TO USE BULK LABEL PRINTING

Maintenance

1. The bulk label print function is found in the inventory module under the Processing section.

 The function is also available on the following processing screens as seen below: GRV's, Supplier Invoices, Inventory Assemblies, Process Manufacturing, Inventory Adjustments.

Dec Number CD 00000	0001			1

Features

1. You can also choose whether you want to print the price in the label, and you can also select the pricelist you would like to use, and you can also filter your items by location, category or sub-category.
